DETAILED ACTION

Allowable Subject Matter

All claims are allowed. Claims 1-24 are allowed. The following is an examiner's statement of reasons for allowance: The issue is that of prior art that can be properly be dated. Applicant has argued that the cited prior art cannot be properly be dated in accordance with the requirements of MPEP. Assuming that MPEP indeed requires such requirements, the prior art cannot be dated as cited previously. Indeed, this eliminates the prior art that has been searched and found. See file history of this application. By the requirements of MPEP as argued by Applicant (which requires entirety and fullness of the features of claims to be dated to before the date of claimed invention and not merely the mention of the features to be so dated), even the art that was cited by Applicant cannot fully be considered prior art. Because of the consideration of equity, art cited by Applicant has been considered only to the extent of the logical implications of Applicant's argument regarding requirements of MPEP.

While the examiner has actual knowledge (albeit non-documented) that the claimed invention was well known to others before the claimed date of the claimed invention, this actual knowledge is insufficient without proper documentation. Indeed, citation of the proper prior art (as properly dated and documented) appears to be beyond the present resources -- because of the requirements of MPEP as argued by Applicant, wherein the requirements of MPEP are more strict than the requirements for prior art to be cited in a federal court proceeding regarding validity. Regarding the

requirements of MPEP, please note the arguments presented by Applicant at Request

for Pre-Appeal Conference. Applicant has stated that even the features well known to

those of ordinary skill in the art require documentation when used in a rejection. Thus,

the proper prior art (as properly dated and documented) did not teach or suggest the

particular features of the claims.
